

AB

The Jumpstart on an Elite Career

High tech, complex cutting edge systems
and computers.

Aviation Boatswain's Mates play a major part in launching and recovering naval aircraft quickly and safely from land or ships. This includes preparing and fueling planes prior to take-off and after landing.

They may specialize in launching and recovering aircraft on the flight deck of an aircraft carrier, ABE; aircraft fueling and fuel systems, ABF; or aircraft handling, fire fighting and salvage and rescue operations, ABH. Later in their careers ABs can earn the advanced AB rating that requires supervision of all these individual specialties.

In addition AB's may also volunteer for programs such as SEAL Team or EOD. See (See the Special Warfare Program for details.)

What They Do

ABE (AVIATION BOATWAIN'S MATE - LAUNCH/RECOVERY)

The duties performed by ABEs include:

- Maintaining and performing organizational maintenance on hydraulic and steam catapults, barricades, arresting gear and arresting gear engines
- Operating catapult launch and arresting consoles, firing panels, water brakes, blast deflectors and cooling panels
- Performing aircraft-handling duties related to the operation of launching and recovery of naval aircraft

ABF (AVIATION BOATWAIN'S MATE - FUELS)

The duties performed by ABFs include:

- Operating, maintaining and performing organizational maintenance on aviation fueling and lubricating oil systems on CVs, CVNs, LPHS and LPDS
- Observing and enforcing handling safety precautions and maintaining fuel quality surveillance and control in aviation fuel systems
- Supervising the operation and servicing of fuel farms and equipment associated with the fueling and defueling of aircraft ashore and afloat
- Training, directing and supervising fire fighting crews, fire rescue teams, and damage control parties in assigned fuel and lubricating oil spaces

ABH (AVIATION BOATWAIN'S MATE - AIRCRAFT HANDLER)

The duties performed by ABHs include:

- Supervising the movement, spotting and securing of aircraft and equipment ashore and afloat
- Performing crash rescue, fire fighting, crash removal and damage control duties in connection with launching and recovery of aircraft

Credit Recommendations

Depending on which "A" school you attend, the American Council on Education recommends that you will have earned the following possible credits hours in the vocational certificate category and lower division bachelor's/associates degree category: (ABE) 1 semester hour in industrial equipment maintenance; (ABF) 1 semester hour in aircraft ground operations and 1 in industrial maintenance practices; and, (ABH) 1 semester hour in heavy equipment operation (fire fighting), 2 hours in aircraft ground handling, 1 in fire fighting principals and 1 hour in industrial safety. Throughout your career, you may have an opportunity to attend advanced technical training ("C" schools) which may be eligible for additional college credits.

Career Path After Recruit Training

Enlistees are taught the fundamentals of this rating through on-the-job training or formal Navy schooling. Advanced technical and operational training is available in this rating during later stages of career development.

School	Present Location	Approximate Training Time	Subjects	Training Methods
Class "A" Technical School	NTTC Pensacola, FL.	5 weeks (ABE) 6 weeks (ABF) 6 weeks (ABH)	Aviation basic theory and basic skills required for rating	Group instruction and practical application

After "A" school, aviation boatswain's mates may be assigned to aircraft carriers, LHAs, LPHs, LPDs or Naval Air Stations in the United States or overseas. They may also be assigned to other types of ships with airplanes or helicopters. If they re-enlist, they may go to "C" school for further training. During a 20-year period in the Navy, ABs spend about 60 percent of their time assigned to fleet units and 40 percent to shore stations.

All personnel now receive sea pay at sea (E-1 to E-9).

Qualifications and Interests

To qualify for placement in the AB rating, individuals should relate well with other people, be physically fit and have manual dexterity. They should have a keen awareness of the need for attention to required details to safely complete a job, the ability to do repetitive tasks and be good team workers.

Other helpful traits include curiosity and competence with tools, equipment and machines. **Normal hearing and color perception is required for all three ratings.**

Working Environment

Most of the work in this rating is performed outdoors on the deck of aircraft carriers, in all climatic conditions, in fast-paced and often potentially hazardous environments. ABs work closely with others in aviation ratings.

Opportunities

Opportunities in this rating are good. At present, about 4,900 men and women work in the three AB specialties.
